DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

2. This application contains Claims 1 to 36 drawn to an invention nonelected with traverse in the paper filed February 14, 2005. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 103

3. Claims 37 to 55 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Benefiel for the reasons set forth in Paragraph 3 of the last Office action (paper mailed March 31, 2005).

Applicant's remarks in the response filed July 8, 2005 have been carefully considered but are not found to be persuasive. In particular, Applicant believes that Benefiel does not disclose coating material with first and second reflective materials. This argument is not persuasive. Benefiel produces coiled metal stock having a "high tech" finish described as having improved depth, gloss, distinctness of image, chromaticity and durability. Clearly, a glossy finish, as suggested by Benefiel, must have reflective properties of some extent or it would not be glossy. Furthermore, Applicant has no disclosure of using coating materials other than those suggested by Benefiel; i.e., polyesters, acrylics and fluoropolymers. Thus, Applicant's use of the term

Art Unit: 3725

"reflective" is not considered to distinguish over the "glossy" materials suggested by Benefiel.

Additionally, it appears that the crux of the invention is the production of completely coated stock material which may be coiled for storage and subsequently shaped into an end product, thus avoiding the more cumbersome procedure of applying the coating after formation of the product. This is exactly the problem addressed by Benefiel. See column 2, lines 60 to 69. One skilled in the art would be able to select particular coating materials to optimize desired characteristics in any end product intended to be formed from the coated stock following the teaching of Benefiel.

Applicant points out that Benefiel discloses application of a clear topcoat. However, Benefiel suggests that the topcoat may also be pigmented. See column 3, line 25, and column 7, lines 7 to 9.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
